

Dmytro Kozlenko

TypeScript / HTML5 Game Developer | PixiJS

kovvalsking@gmail.com | +380671399345 | Kyiv, Ukraine | linkedin.com/in/dkozlenko | github.com/kowalsking

SUMMARY

TypeScript / HTML5 Game Developer with 6+ years of experience building browser games, interactive applications, playable ads, and iGaming products. Strong in PixiJS, Spine, rendering performance, legacy code refactoring, and game architecture. Experienced in delivering features end-to-end and collaborating with designers, artists, and engineers in remote teams.

EXPERIENCE

Mersie Limited, TypeScript Game Developer

11/2024 – 04/2026 | Remote

- Maintained and extended production HTML5 game projects built with PixiJS and TypeScript.
- Refactored legacy modules and game-state logic to improve maintainability and reduce technical debt.
- Implemented reusable UI and gameplay components in collaboration with artists and game designers.
- Investigated performance bottlenecks using browser profiling tools and optimized rendering and update loops.
- Participated in architectural decisions related to game lifecycle, feature integration, and codebase structure.

Technologies: **PixiJS, TypeScript, JSON, Spine**

BiniBambini, JS Game Developer

02/2022 – 10/2024 | Remote

- Developed and integrated new gameplay mechanics for browser-based games.
- Created playable ads based on existing game projects, adapting core gameplay into lightweight interactive advertising experiences.
- Designed and implemented mini-games, from gameplay logic and UI integration to release-ready builds.
- Contributed to architectural improvements and their implementation across game projects.
- Maintained and extended the internal game engine, improving reusable systems and supporting development needs across multiple projects.

Technologies: **PixiJS, TypeScript, JSON, Spine, Cordova**

Digicode, HTML5 Game Developer

10/2020 – 01/2022 | Remote

- Maintained and extended existing HTML5 game projects built with PixiJS and TypeScript.
- Developed browser games from scratch, including gameplay logic, UI components, asset integration, and game-state management.
- Collaborated directly with developers and the art team to translate game concepts and visual assets into production-ready features.
- Participated in technical discussions and architectural decisions for new game projects.
- Investigated and addressed performance bottlenecks, improving rendering and runtime performance across game builds.

Technologies: **PixiJS, TypeScript, Vue, Spine, WebSockets**

NetGame Entertainment, Junior HTML5 Game Developer

05/2020 – 07/2020 | Remote

Built a PixiJS particle editor from scratch for internal use by game designers.

Mox.tv, JavaScript Developer

02/2019 – 03/2020 | Kyiv, Ukraine

- Built internal applications end-to-end, including architecture decisions, documentation, and API development.
- Support for legacy projects

Technologies: NodeJS, JavaScript, Chrome DevTools

Mediawayss, Junior JavaScript Developer

07/2018 – 02/2019 | Kyiv, Ukraine

- Debugging advertising units on customer pages
- Development of small projects for the internal needs of the company

Technologies: JavaScript (ES5/ES6), VAST, Chrome DevTools

EDUCATION

Master's degree, NTUU "Igor Sikorsky Kyiv Polytechnic Institute"

12/2025 | Kyiv, Ukraine

Faculty of Radio Engineering

Bachelor's degree, NTUU "Igor Sikorsky Kyiv Polytechnic Institute"

03/2017 | Kyiv, Ukraine

Faculty of Radio Engineering

SKILLS

Game Development

TypeScript, JavaScript, HTML5, PixiJS, Spine, browser games, playable ads

Web & Integration

WebSockets, REST APIs, JSON, Node.js, React fundamentals

Engineering

Game architecture, performance optimization, legacy refactoring, debugging, rendering optimization

Rendering

PixiJS rendering, WebGL fundamentals, asset loading, animation systems
